**Subject:** Notification

Attached is message for notification to staff approved by ocir and ra. Office of external affairs has a shortened desk statement ready. Please let Terri White and I know when you have notified staff. Thanks! Linda

Good afternoon, I wanted to provide an update of activities at the Freedom Industries site in Charleston, WV. EPA remains committed to supporting West Virginia in their remediation efforts.

The site has been stable for more than two weeks. WVDEP staff and management have been diligent in overseeing the activities on-site and approving the facility's plans for the continued remediation of this site in accordance with all of WVDEP's orders. The current operations at the site are standard remediation activities consisting of pumping and controlling of water, along with maintenance of boom in the river, following plans prepared by the company that have been reviewed by the State and EPA. The facility has worked with WVDEP to complete the ordered tasks as expeditiously as possible.

As such, EPA is discontinuing a daily on-site presence at the Freedom Industries facility. West Virginia Department of Environmental Protection (WVDEP) water and waste enforcement staff now are at the Freedom facility overseeing operations from 8am to 8pm daily. If conditions change, or if WVDEP needs federal on-site assistance, two Region III On Scene Coordinators (OSCs) who live in West Virginia would be able respond in a matter of hours. EPA OSCs are also available by phone and email to provide any guidance that WVDEP may request. EPA's contractors can be redeployed as necessary. EPA will return to the site during future tank dismantling to observe site conditions. WVDEP has scheduled a weekly operations meeting at the site. EPA OSCs will either participate by phone or in person as needed in these meetings.
